

CELEBRATING SPRING, GROWTH AND NEW BEGINNINGS....

“ It is such a privilege to work at a company that recycles and shows innovation in its products. What’s even more fantastic is seeing what other people create. The ladies in our community crocheted these beautiful flowers for **Spring Day** with our HDPE “yarn”! ”

It's hard not to get super excited about Spring Day and the fact that another South African summer is just around the corner! We celebrated the new season in a variety of ways, starting with creating awareness about the importance of trees.

We spent a morning with the Agriculture students at Curro Nelspruit promoting awareness for the need to plant and maintain indigenous trees throughout South Africa. Ziziphus mucronata AKA the Buffalo thorn, is one of the DAFF nominated trees of the year and found it's new home one the Curro grounds.

We believe that the youth are agriculture's future and that it is our responsibility to invest time to develop their knowledge & interest. Bill, who is in charge of our research and development, had a little “show and tell” at Curro Nelspruit sharing some ideas and research projects from Multiknit Pty Ltd.

He also highlighted some insights from the Agricultural industry and how we play a big role in it.

We have to admit.... We are so excited about the future of the agricultural industry with these brilliant young minds that will lead it one day!

UNDER CONSTRUCTION

We mentioned new beginnings and if you've visited our offices in White River lately, you'll know why.

Multiknit is continually growing and developing - and we are starting to run out of space for all our innovation to roam in! Luckily our team came up with a *plan*, and we are excited to share the news that Multiknit are building more offices and expanding the team!
